SUBJECT INDEX

aerodynamics
  forebody vortex control 171–234
  unsteady
    scale effects 273–321
    vortex lift enhancement 73–131
aerofoils
  delta wing 93–95, 119–121
  free-streamline 76–77
  Kasper wing 80–82
  RAE 9615 296–300
  unsteady aerodynamics 274–319
  vortex lift 76–85
Air Traffic Control
  automation 334–335, 345–355, 350–359, 365
  capacity 336–341, 347–348, 353, 365
  communication systems 328–329, 343–344, 348–350
  conflict detection 335, 352–353
  costs 343, 344, 360–364
  flight efficiency 336, 341–343, 345, 347–348, 350–355
  flow control 337–341, 342, 350, 353, 355–360
  future systems 345–355
    Air Traffic Management 345–365
    integrated concept 345–355, 359, 365
  ground system functions 327, 328, 329, 343–344, 345–346, 350–354
  helicopters 326
  navigation systems 328–331, 331–334, 344, 348–350
  present systems 325–345
    components 343–345
    Flight Management Systems 325, 331–334
    Instrument Flight Rules 328
    metering 337, 342
    sequencing 339–341, 342
    shortcomings 336–345
    Visual Flight Rules 328
  separation 328, 338–341, 350
  surveillance systems 328–329, 331, 344, 348–350
  trajectories 335, 341–342, 352–353
air traffic management, terminal area 323–368
  Air Traffic Control 325–345
  arrival assistance tools 355–360
  communications systems 348–350, 351–354
  data links 325, 345–346, 348, 365
  navigation systems 325, 348–350
  satellite technology 348–350
  surveillance systems 348–350, 351–355
  trajectories 325, 352–353, 360–365
aircraft, forebody vortex control 171–234
Apollo mission 9
attitude control thruster 1, 57

boundary layers
  Görtler instability 235–271
  plume flow 15–20, 24, 30, 66
  plume impingement 36–37
  scale effects in unsteady aerodynamics 273–321
  separation control 171–234
buffeting *see* unsteady aerodynamics

centrifugal forces, Görtler instability 235–271
combat aircraft 133–170
cryogenic wind tunnels 133, 137, 160

Eidetics International Inc. 176, 183–190, 199–216, 225–227
EUROCONTROL 346–347, 355, 359

fighter aircraft, forebody vortex control 171–234
Flight Information Regions 325
Flight Management Systems 325, 331–334
flow visualisation
  Görtler instability 238–246, 253–258
  vortex lift 79–85
flutter *see* unsteady aerodynamics
forebody vortex control 171–234
  jet blowing 174–176, 190–216, 228, 230–233
    fighter configuration 199–216
    vortex wake 195–196, 198–199
    water tunnel tests 190, 192–193, 211–216
    wind tunnel tests 190–192, 193–211
  movable strakes 174–190
    asymmetric strakes 187–190
    fighter configuration 184–186
    fuselage 176–182
    symmetric strakes 186–187, 189–190, 203–211
    trapezoidal wing 181–183
    wind tunnel tests 176–190
  surface holes 174–176, 219–225, 228–229, 230–233
    transition strips 223–225
    wind tunnel tests 219–225
  surface slots 174–176, 216–219, 228–233
    water tunnel tests 216–219
  tip strakes 225–227, 228, 230–233
    water tunnel tests 225–227
  yawing moment 171–234

Global Navigation Satellite Systems 348–349
Görtler instability, boundary layers 235–271
  buoyancy forces 264–265
  heat transfer effects 264–266
  inviscid theory 237
  linear disturbance 238–253, 265
    flow visualisation 238–246, 266
    theory 246–253
  nonlinear disturbance 253–262, 265
    flow visualisation 253–258
    secondary instabilities 256–266
    theory 258–262
    Tollmein–Schlichting waves 261–262
  turbulent boundary layers 262–264, 266

heat transfer
  Görtler instability 264–266
  plume impingement 45–52, 59, 65, 66–67

helicopters
  air traffic control 326
  vortex lift 123

International Civil Aviation Organization
      (ICAO) 325, 327, 347

Kasper wing 80–82

lift *see* vortex lift

NASA
  Ames Researech Center 190, 194–199
  Langley Research Center 79–80, 176–190
Northrop Corporation 190–194
nozzles
  forebody vortex control 190–216
  rocket thrusters
    plume flow and impingement 1–71
    shape 8

ONERA 80

plumes
  flow 1–71
    back flow 23–24, 66
    characteristics calculations 12–22, 66
    condensation 24–25, 58
    far field modelling 12–15
    flow fields 12–13, 59, 66
    interference regimes 52–56
    mass separation 23, 56
    measurement techniques 56–65
    near field modelling 25–33
    nozzle flow 25–33, 56–57
    rarefaction effects 21–23, 52, 58–59, 66–67
    stagnation 12, 20, 26, 53–54
  impingement 1–71
    flow characteristics 33–37
    heat transfer 45–52, 59, 65, 66–67
    measurement techniques 56–65
    pressure forces 37–45, 56, 66
    shock structure 34–37, 54, 57–59, 66
    space manoeuvres 9–11, 52
  interaction 52–56, 67
    measurement techniques 59, 61

RAE 139, 144–162
  aerofoil 9615 296–300
  High Incidence Research Model 219–225
  Model 2209 135–136, 144–162
rocket thrusters
  geostationary orbit satellite 5–6
  plume flow and impingement 1–71
  propellants 6–7, 9

Saab Scania, wind tunnel model 79–80
satellite technology
  air traffic management 348–350
  rocket thrusters 1–9
scale effects, unsteady aerodynamics 273–321
space technology, plume flow and
      impingement 1–71
super lift *see* vortex lift
swept wings
  vortex lift enhancement 125–126
  wind tunnel models 133–170

terminals *see* air traffic management
Tollmein–Schlichting waves 261–262
traffic management *see* air traffic management
trajectories
  Air Traffic Control 335, 341–342, 352–353
  air traffic management 325, 352–353, 360–365

unsteady aerodynamics, scale effects 273–321
  boundary layer transition 275–280, 292–319
  buffeting 280–292, 303–308, 319
    onset 281–287, 303–305, 318
    severity 287–292
  dynamic stalling 296–303, 315–316, 318
  flutter 315–316, 319
  hinge moments 313–315
  periodic flows 292–296
  pitching tests 296–318
  pressure measurements 303–312
  stability derivatives 316–318
  subsonic speeds 282–284, 286–287, 303,
      309–310
  transonic speeds 282–284, 286–287, 292–318
  vortex lift enhancement 73–131
  water tunnel tests 300–303
  wind tunnel tests 274–319
US Air Force 176, 183–190

vortex lift, unsteady excitation 73–131
  acoustic effects 77, 97–102, 105–108, 111–112,
      123
  attached flow 74–75
  delta wing 93–95, 119–121
  detached vortex flow 74–77, 80–85, 122–123
  flame stabiliser 82–83
  flame structure 103–104
  flow visualisation 79–85
  free-streamline aerofoil 76–77
  Kasper wing 80–82
  post-stall angle of attack 75–88
  streaming 105–112, 115–117, 122–123
    acoustic streaming 105–108, 111
    vortical streaming 108–112
  swept wings 125–126
  theoretical modelling 85–87
  vortex breakdown 84–85
  vortex layer evolution 88–112
    rolled-up layers 90–95, 112, 119–126
    straight layers 89–91, 119
  vortex shedding 88–112, 96–105, 126
  water tunnel tests 80
  wave–vortex interaction theory 112–122
    numerical methods 117–122, 126
    wave-mean flow 115–117
  wave–vortex resonance 96–105, 122
    internal resonance 96
    sound–vortex resonance 97–101, 112
    vortex–vortex resonance 101–105
  wind tunnel tests 76–85
vortices *see also* vortex lift
  forebody vortex control 171–234
  Görtler instability 235–271
  sting supported wind tunnel models 167–170
  unsteady excitation 73–131

water tunnel models
  forebody vortex control 174–175
    jet blowing 190, 192–193, 211–216
    surface slots 216–219
    tip strakes 225–227
  scale effects in unsteady aerodynamics 300–303
  vortex lift 80
wind tunnel models
  combat aircraft 133–170

cryogenic facilities 133, 137, 160
forebody vortex control
  jet blowing 190–192, 193–211
  movable strakes 176–190
  surface holes 219–225
RAE Model 2209 135–136, 144–162
rigid body response 133–170
Saab Scania's model 79–80
scale effects 134–170, 274–319
  unsteady aerodynamics 274–319
sting supported 133–170
  attached flows 137
  bending 133, 154–157, 161, 165–166
  body vortices 167–170
  bump stops 133, 135, 140–141, 156–157, 162
  damping 133, 135, 139–144, 150–162, 163–170
  quadrant traverse rate 142–144
  separated flows 137–139
  stability 137–144
  yawing 133, 155–157
swept wing model 133–170
vortex lift 76–85
